

New services 2010

We are proud to announce two exciting new developments for 2010.

Sussex Health Care
support for life

Orchard Lodge

Warnham

Opening Spring 2010

We are proud to announce a new 10-bedded bungalow for young people with learning difficulties and physical disabilities that will open in Spring next year at Orchard Lodge in Warnham. All bedrooms will have their own en suite facilities with track hoisting available throughout. There will also be the added benefit of a swimming pool for service users.

Wisteria Lodge

Nutley

Opening Spring 2010

In a similar move we are also adding a new 10-bedded bungalow for young people with learning difficulties and physical disabilities to Wisteria Lodge in Nutley. This facility will also open next Spring and all bedrooms will have their own en suite bathroom. Track hoisting will be available throughout and in this case there will be a hydrotherapy pool for the benefit of service users.

The following standards apply to both locations:

Wheelchair access will be developed inside and outside the building. A hydrotherapy pool will be available within the home plus a separate snoozelin facility. All food will be cooked on the premises and service users encouraged to assist with planning their own menus.

Each service user will be assisted to develop his or her own person centred plan. **Sussex Health Care** work very closely with local colleges and outreach services and service users will be given the opportunity to attend a college or outreach service that meets their needs. Much emphasis will be placed on ensuring that service users integrate with the local community and trips to the town, cinema, pubs and bowling are just some of the outings that will be organised.

The home will be staffed 24 hours a day and there will be waking night staff on duty. NVQ training will be available. A nurse will be available on every shift to deal with any health issues. Physiotherapists, Occupational Therapists and Speech Therapists will also be available as will music, aromatherapy and reflexology. Individual therapy sessions will form part of the individual's person centred plan. The home will be registered with a local GP who will visit weekly and when needed.
